We Polish, Repair & Seal all Stone Surfaces

Stone Deep Clean for Showers and Floors

Stone Deep Clean is a powerful, heavy-duty cleaner and degreaser recommended by The Marble Man. It is used to clean stone surfaces that have been neglected or subjected to heavy use such as shower tiles and glass and indoor floor tiles.

Key Features

- It is a non-acidic, biodegradable detergent
- It removes stubborn, in-ground dirt, grease and soap scum from stone tiles, grout and glass in showers and high traffic areas
- It can be used to strip wax and other floor surface coatings

Surfaces

- Polished and unpolished natural stone shower and bathroom tiles and glass, and floors made from granite, limestone, marble, sandstone, slate and travertine
- Engineered stone tiles such as Caesarstone, Essastone, Quantum Quartz, Silestone, Smartstone and HanStone
- Other surfaces – porcelain, ceramic, terracotta tiles; cement pavers; masonry; grout

Tips

- Always test a small, inconspicuous area first to determine suitability
- Use in showers at least once per week to prevent the build-up of soap scum
- Use the recommended white nylon **Scrub A Dub** pad only for tough stains
- Professional cleaning before using **Stone Deep Clean** for the first time is recommended to prepare the stone surface for effective, regular cleaning

DO NOT use green scourers as these will scratch stone and glass

Application – Before use shake bottle well; Read label before use

Showers

- Step 1** Mix 1 part **Stone Deep Clean** to 1 part water in a spray bottle
- Step 2** Wet shower walls floor with clean water
- Step 3** Spray on one wall at a time so the solution does not dry out (approximately 9 sprays per wall)
- Step 4** Use the white nylon **Scrub A Dub** pad to spread the cleaner evenly over the walls and floor
- Step 5** Start from the top and work your way down the wall, scrubbing and using circular motions (concentrate on the lower section which is subject to the most build-up of products)
- Step 6** Rinse the scrubbed walls thoroughly with clean water to reveal a fresh, sparkling shower

Floors

- Step 1** Mix 1 part **Stone Deep Clean** to 5 parts water in a bucket of clean water
- Step 2** Mop the area with the solution
- Step 3** Use a scrubbing broom or a white nylon **Scrub A Dub** pad to remove tough stains
- Step 4** Soak up excess product with a towel or mop
- Step 5** Rinse the scrubbed floor with clean water and buff dry with a towel or dry mop
